

INTERACTIVE WATERZONE FOR DANES CAMP!

Danes Camp Leisure Centre is just cutting the ribbon on the latest range of interactive wet play equipment designed, manufactured and installed by Hippo Leisure Products.

A double lane, pirate themed toddler slide provides the entrance to the new play area housing an interactive water ball complete with multiple water jets, fill and spill buckets, interactive masts with tipping buckets, spray rails, and waterwheels. The area explodes into life creating a water playzone enthralling visitors of all ages.

A new 4-arm mushroom shower completes the interactive features with a large tipping bucket, themed shower and water wheel. The area is finished with Hippo's unique safety surface creating a soft, impact absorbing rubber surface...perfect for little wet feet.

The new features all utilise existing water supplies creating savings on costly pipe work, disruption and shutdown time.

Hippo teamed up with PowerMaster, the experts in Variable Speed Drive technology, to provide Danes Camp with a VSD for their features pump to increase their pump efficiency. The projections show the VSD will have paid for itself within 2 years.

John Howard, Leisure Facilities & Maintenance Officer for the Northampton group, commented "The new features that Hippo have installed have added an extra dimension to Danes Camp's Pool, we now have equipment that our customers can interact with as well as playing on.

We are very pleased with the finished project which is proving to be immensely popular with swimmers of all ages "
