

FUN, FILL & SPLASH

Hippo Leisure's exciting new range of Fun, Fill & Splash products are proving to be just what the winter blues ordered for the children of Kingston Upon Thames and Tenterden, Kent. Hippo's bright new interactive wet play equipment has been custom manufactured to replace existing water features at each site.

A new mushroom shower and pirate ship slide are at the heart of Tenterden's refurbished look. Tipping buckets, spinning water wheels and a squirting treasure chest now come alive in the leisure pool. A themed water arch completes the installation creating a hidden water supply to feed future expansion plans.

Kingfisher Leisure Centre is home to a new eye-catching Waterball! With over 15 water jets and interactive features galore, this innovative new toy sits seamlessly over an existing water supply to an old fountain enabling the installation to be completed without the need to drain the pool or close to the public. The Waterball provides entertainment for the toddlers through to the teens from the Fill & Spill buckets to the water wheels and random tippers.

Safety features such as specially manufactured flexible buckets and foam padding are but two of the unique elements that Hippo products offer.

Tenterden has been finished with Hippo's unique Aquatrol safety surface providing the optimum in non-slip, impact absorbing flooring solution with an integral anti-bacterial coating which prohibits the growth of bacteria for the life of the surface.

Hippo have put together a range of water play packages from as little as £5000 which are currently available on their website.
