

## **SPECTACULAR INTERACTIVE WATER SHOWERS**

Dimensions Leisure Centre have transformed their old mushroom shower into a bright, vibrant new interactive water play feature supplied by Hippo Leisure Products.

The new 4 arm mast was custom manufactured to fit over the existing mushroom shower water supply. Dimensions chose a bright complimentary design to fit in with their existing pool colour and dragon theming.

With a choice of interactive arms, Dimensions were able to choose exactly which features would best suit both the location of the mushroom shower and the age group using the feature. Children are now enjoying the thrill of a large tipping bucket, two cheeky dragon showers, a spray rail and a pipe falls.

The central mast has been clad in Hippo's unique soft-to-touch foam system for maximum safety and protection for little feet and hands. The padding has been coated in a durable plastic skin and finally airbrushed to meet the design choice.

The new feature is already proving extremely popular and has been well received by bathers at Dimensions Leisure Centre.

The shower was easy to install with no shutdown of the pool required and minimal inconvenience caused to both Dimensions and their customers.
