

The Hippo Story from concept to completion

1 Initial Enquiry

Our friendly team will speak to you to gain an insight into your facilities interactive play needs and establish the best course of action to meet these needs.

Our website includes details of our full range of products and services.

Andy from Hippo conducting a site survey.

2 Site Survey

Our experienced Hippo Play Consultants will carry out a site survey where required. They will discuss with you the options that can be offered to rejuvenate your wet play facility, and help to increase visitor numbers and revenue. Hippo caters for a range of budgets, pool shapes and sizes.

3 Customised Quote & Bespoke Design

We will draw up a quote, supported by drawings using the latest CAD software to show how Hippo play products will transform your facility!

Pirate themed Hippo Water Factory design.

4 UK Manufacture

Hippo play features are manufactured at our state of the art factory in Plymouth.

Different stages of the spray application of polyurethane elastomer coatings to a Waterball during the manufacturing process.

The Hippo Team!

5 Installation & Support

Our experienced engineers are trained to work in most conditions and can come up with effective solutions to challenges encountered.

Completed Water Factory Installation.

6 Maintaining & Expanding Features

Hippo offer customised maintenance packages to ensure the optimum performance from your Hippo play features. We can also recommend how to best update or expand existing features.

A possible expansion option for the Water Factory pictured above. The Waterball is linked with a span arm to a 4-arm Mast, which features a large tipping bucket with splash board.
