Windsor Leisure Centre

Project
**Interactive
Play Platform**

Project Value
£70,000

Hippo updated the facilities at Windsor Leisure Centre by installing a Triple Play Platform, with the objective of sustaining regular pool usage and increasing new business revenue. The bright and colourful Play Platform creates a strong visual impact and has a water footprint of 12m, providing a high level of activity per square metre. The Play Platform provides inclusive family play for all ages and abilities.

Interactive features include a high level mast with a large tipping bucket to provide anticipatory and thrilling water play for the 8+ age group. A spray rail housing 17 water nozzles is fixed on one side of the structure providing tactile water effects for users both on and off the platform. The family friendly multi-slide provides an exit that is enjoyable by all age ranges from 0-100! Interactive play panels on the outside of the structure provide 360 degree usage of the structure and are designed specifically for the 0-8 age range.

The surface of the Play Platform has been finished with Hippo's colourful safety surface, providing an impact absorbing and non-slip rubber surface.
